Skills

- Organizational Skills
- Communication Skills
- Problem Solving
- Time Management

Technical Skills

PROGRAMMING LANGUAGES

- Java
- Angular
- Ionic(Basic)

Education

- **Bachelor of Computer Science (BCSC)**
Computer University (Monywa) 2018 DEC - 2020 MAR
Computer Science - 2nd year
- **Java Developer Certificate**
Java Developer Class (JDC) 2023 July - 2023 DEC
Java Programming, Angular Framework

About Me

- Passionate and dedicated Java Developer with a strong foundation in backend development and expertise in building scalable, high-performance applications. My programming journey began at Computer University Monywa, where I developed a solid understanding of data structures and Object-Oriented Programming (OOP) with Java. To further enhance my skills, completed the Java Developer Class (JDC), gaining hands-on experience with the Spring Framework and earning a certification in Spring Java development. I have extensive experience in backend development, including designing and implementing RESTful APIs, integrating third-party services, and ensuring application security and performance. Additionally, I possess strong database management skills using MySQL, including schema design, writing complex queries, optimizing performance, and ensuring efficient data storage and retrieval. My experience also extends to working with microservices architecture, authentication mechanisms, and cloud-based deployments. I am currently seeking opportunities as a Java Developer, where I can apply my expertise in Java, Spring Boot, MySQL, and modern backend technologies to develop impactful software solutions. I am highly motivated to learn new technologies, collaborate with dynamic teams, and contribute to innovative projects that drive business success.

Experience

BLUE STONE SOLUTION COMPANY

Java Backend Developer | Full Stack Developer 2023DEC - NOW

As a Full Stack Developer at Blue Stone Solution Company, I specialized in backend development with Java, focusing on building secure, scalable, and high-performance applications. I played a key role in developing fintech solutions, particularly in cryptocurrency wallet integration and blockchain-related projects. My contributions extended across the entire software development lifecycle, ensuring efficient and maintainable code.

Key Responsibilities & Achievements:

- Developed and maintained web and mobile applications using Angular and Ionic.

BACKEND TECHNOLOGIES

- Java(Core Java, OOP, Collections, Multithreading)
- Spring Boot(Spring MVC, Spring Security, Spring Data JPA, Hibernate)
- RESFUL APIs(API design, authentication, and authorization)
- Microservices Architecture
- JWT & OAuth2 Authentication

FRONTEND TECHNOLOGIES

- Angular, Ionic (Basic UI development and API integration)

DATABASE TECHNOLOGIES

- MySQL (Schema design, complex queries, performance optimization)

DEVOPS & TOOLS

- Git, GitLab (Version control)
- Gradle, Jenkins (Build and deployment automation)

BLOCKCHAIN & FINTECH SKILLS

- Basic Blockchain Integration
- Cryptocurrency Wallet Development
- Smart Contract Interaction (Basic understanding)

- Designed and implemented secure and efficient backend systems with Java and Spring Boot, ensuring high performance and reliability.
- Collaborated with blockchain developers to integrate cryptocurrency wallet functionalities into fintech applications.
- Worked extensively with MySQL, optimizing database performance and writing complex queries for secure data handling.
- Participated in requirement gathering, system design, development, testing, and deployment.
- Implemented clean code practices and optimized existing codebases to improve code quality and application performance.
- Gained in-depth experience in the fintech domain, contributing to secure wallet development and blockchain network integrations.

PROJECTS

MediCubo Crypto Wallet (R2E) – Thailand

The MediCubo Crypto Wallet (R2E) is a blockchain-based recycling initiative that rewards MediEarth members for returning PET bottles. Users earn points that can be converted into NFTs or spent as cash in real life. The wallet supports internal and external transfers, card integration, and coin loans, offering flexible options for utilizing rewards. This system promotes environmental sustainability by creating a circular economy, transforming waste into valuable digital assets.

Role: Java Backend Developer
Angular Frontend Developer

Tools & Technologies:

Spring Boot, Spring Security, Spring Data JPA, Hibernate, MySQL, Angular, Gradle, Jenkins, Docker
[R2E Wallet](#) | [Admin Panel](#)

MICROFINANCE (MIFOS)

I have worked extensively with Mifos X, an open-source core banking platform designed to provide financial services to underserved populations. My role focused on enhancing and customizing the platform's backend architecture to meet specific institutional requirements.

Role: Java Backend Developer

Tools & Technologies:

Java, Spring, REST API, MySQL, Hibernate, Apache Fineract (Mifos X backend engine), Maven, Git, Postman
